

Customized water for your entire home.

SOFTENER/FILTER

Master Water Alliance Series 2.0 RF unit combines the power of two medias in one tank with dual-chamber technology. The high-performance resin media works in conjunction with a specialized filtration media to address your specific water needs. Every home is different, all water sources will have a unique mixture of issues. The RF top chamber is a versatile feature that allows us to create a system specific to your water needs. We offer a variety of different filtration options to customize your unit's top chamber capabilities.

System Features & Benefits:

- **2 Systems In 1:** Softens and filters water thanks to an innovative "mid-plate" design
- **Custom Filtration Options:** Various media options are available to address chlorine taste and odor, acidic water, iron or suspended particles
- **Softening Resin:** Reduces hardness, prolonging life of plumbing system and reducing energy consumption
- **Metered Control:** Self-adjusts regeneration cycles based on household's trend of water consumption
- **Service Alarms:** Based on time and/or gallons to optimize maintenance schedules

MasterWater.com

Customized water for your entire home.

SOFTENER/FILTER

Featuring The Vortech® Plate

Vortech Technology creates fluidity of the media bed and extends contaminant removal capacity—meaning fewer regenerations and a significant reduction in water usage.

The Medias

Calcite

- Neutralizes acidic waters to prevent damage to fixtures and plumbing

Catalytic Carbon

- Reduces hydrogen sulfide and chlorine

Greensand Plus™

- Reduces iron, manganese, and hydrogen sulfide

Turbidex™

- Reduces turbid particles by both physical and electrostatic adsorption

Featured Media

• Resin

- Hardness reduction
- Stops energy drain in water heaters
- Softens household water using minimal salt and water

	ALLIANCE 2.0 - Resin/Filter (RF)
